John Ronald Reuel Tolkien was born on January 3, 1892, in Bloemfontain, South Africa. His parents had moved there from England so that his father, Arthur, could work for the bank of Africa. Tolkien lost both parents early in life—his father died in Africa in 1896 after the rest of the family had returned to England, and his mother, Mabel, died in 1904 near Birmingham, England. After Mabel's death, Tolkien and his younger brother, Hilary, came under the care of Father Francis Morgan, a friend of the family's. Soon after, Tolkien went to King Edward's School and then to Oxford.

At Oxford, Tolkien pursued a degree in English language and literature. He developed a particular passion for philology, the study of languages. While studying Old English, Anglo-Saxon, and Welsh poetry, he continued experimenting with a language of his own, which he had started to do in his youth. This language would form the groundwork for his imagined world known as Middle-Earth.

By 1916, Tolkien had received his degree and married his childhood sweetheart, Edith Bratt. He eventually took a teaching position at Oxford. By 1929, he had had his fourth child with Edith. During these years, he also began his great mythology of Middle-Earth, a compendium of stories called The Silmarillion. Out of these stories grew The Hobbit (1936), his first published work. A simple children's story about a small person who takes part in great adventures, the novel's playful tone and imagery made it a hit with both children and adults. The Hobbit's success also gave Tolkien a huge public that was anxious to learn more about the meticulously developed world that he had created around his invented language and mythology, only a small part of which was detailed in The Hobbit.

The Hobbit's plot and characters combined the ancient heroic Anglo-Saxon and Scandinavian epics Tolkien studied with the middle-class rural England in which he lived. In many ways, the novel's charm and humor lie in transplanting a simple, pastoral Englishman of the 1930s into a heroic medieval setting. Tolkien acknowledged that his hero, Bilbo Baggins, was patterned on the rural Englishmen of his own time.

By the time Tolkien began to work on the sequel to The Hobbit, he had developed a friendship with another well-known Oxford professor and writer, C.S. Lewis, author of The Chronicles of Narnia. Their friendship lasted for many years. Tolkien helped convert Lewis to Christianity (although Tolkien, a Roman Catholic, was disappointed that Lewis became a Protestant), and the two critiqued each other's work as part of an informal group of writers known as the Inklings.

From 1945 to 1959, Tolkien continued to teach at Oxford and wrote The Lord of the Rings trilogy, which served as a follow-up to The Hobbit. The trilogy brought Tolkien fame in England and America, but he was never a public figure. He continued work on The Silmarillion and other tales and led a quiet life. Despite his public acclaim, he was most comfortable with middle-class surroundings and peace in which to write and think. Tolkien died on September 2, 1973. The Silmarillion was edited and published posthumously by his son Christopher in 1977.
Bilbo Baggins lives a quiet, peaceful life in his comfortable hole at Bag End. Bilbo lives in a hole because he is a hobbit—one of a race of small, plump people about half the size of humans, with furry toes and a great love of good food and drink. Bilbo is quite content at Bag End, near the bustling hobbit village of Hobbiton, but one day his comfort is shattered by the arrival of the old wizard Gandalf, who persuades Bilbo to set out on an adventure with a group of thirteen militant dwarves. The dwarves are embarking on a great quest to reclaim their treasure from the marauding dragon Smaug, and Bilbo is to act as their “burglar.” The dwarves are very skeptical about Gandalf’s choice for a burglar, and Bilbo is terrified to leave his comfortable life to seek adventure. But Gandalf assures both Bilbo and the dwarves that there is more to the little hobbit than meets the eye.

Shortly after the group sets out, two hungry trolls capture all of them except for Gandalf. Gandalf tricks the trolls into remaining outside when the sun comes up, and the sunlight turns the nocturnal trolls to stone. The group finds a great cache of weapons in the trolls’ camp. Gandalf and the dwarf lord Thorin take magic swords, and Bilbo takes a small sword of his own.

The group rests at the elfish stronghold of Rivendell, where they receive advice from the great elf lord Elrond, then sets out to cross the Misty Mountains. When they find shelter in a cave during a snowstorm, a group of goblins who live in the caverns beneath the mountain take them prisoner. Gandalf leads the dwarves to a passage out of the mountain, but they accidentally leave behind Bilbo.

Wandering through the tunnels, Bilbo finds a strange golden ring lying on the ground. He takes the ring and puts it in his pocket. Soon he encounters Gollum, a hissing, whining creature who lives in a pool in the caverns and hunts fish and goblins. Gollum wants to eat Bilbo, and the two have a contest of riddles to determine Bilbo’s fate. Bilbo wins by asking the dubious riddle, “What have I got in my pocket?”

Gollum wants to eat Bilbo anyway, and he disappears to fetch his magic ring, which turns its wearer invisible. The ring, however, is the same one Bilbo has already found, and Bilbo uses it to escape from Gollum and flee the goblins. He finds a tunnel leading up out of the mountain and discovers that the dwarves and Gandalf have already escaped. Evil wolves known as Wargs pursue them, but Bilbo and his comrades are helped to safety by a group of great eagles and by Beorn, a creature who can change shape from a man into a bear.

The company enters the dark forest of Mirkwood, and, making matters worse, Gandalf abandons them to see to some other urgent business. In the forest, the dwarves are caught in the webs of some giant spiders, and Bilbo must rescue them with his sword and magic ring. After slaying his first spider, Bilbo names his sword Sting. Shortly after escaping the spiders, the unlucky dwarves are captured by a group of wood elves who live near the river that runs through Mirkwood. Bilbo uses his ring to help the company escape and slips the dwarves away from the elves by hiding them inside barrels, which he then floats down the river. The dwarves arrive at Lake Town, a human settlement near the Lonely Mountain, under which the great dragon sleeps with Thorin’s treasure.

After sneaking into the mountain, Bilbo talks to the sly dragon Smaug, who unwittingly reveals that his armorlike scales have a weak spot near his heart. When Bilbo steals a golden cup from the dragon’s hoard, Smaug is furious and flies out of the mountain to burn Lake Town in his rage. Bard, a heroic archer, has learned the secret about Smaug’s weakness from a thrush, and he fires an arrow into the dragon’s heart, killing him. Before Smaug dies, however, he burns Lake Town to the ground.

The humans of Lake Town and Elrond’s elves of Mirkwood march to the Lonely Mountain to seek a share of the treasure as compensation for their losses and aid, but Thorin greedily refuses, and the humans and elves besiege the mountain, trapping the dwarves and the hobbit inside. Bilbo sneaks out to join the humans in an attempt to bring peace. When Thorin learns what Bilbo has done, he is livid, but Gandalf suddenly reappears and saves Bilbo from the dwarf lord’s wrath.

At this moment, an army of goblins and Wargs marches on the mountain, and the humans, elves, and dwarves are forced to band together to defeat them. The goblins nearly win, but the arrival of Beorn and the eagles helps the good armies win the battle.

After the battle, Bilbo and Gandalf return to Hobbiton, where Bilbo continues to live. He is no longer accepted by respectable hobbit society, but he does not care. Bilbo now prefers to talk to elves and wizards, and
he is deeply content to be back among the familiar comforts of home after his grand and harrowing adventures.
Character List

Individual Characters

**Bilbo Baggins** The hero of the story. Bilbo is a hobbit, “a short, human-like person.” Commonsensical and fastidious, Bilbo leads a quiet life in his comfortable hole at Bag End and, like most hobbits, is content to stay at home. But Bilbo possesses a great deal of untapped inner strength, and when the wizard Gandalf persuades Bilbo to join a group of dwarves on a quest to reclaim their gold from a marauding dragon, Bilbo ends up playing a crucial role as the company’s burglar. Bilbo’s adventures awaken his courage and initiative and prove his relentless ability to do what needs to be done.

**Gandalf** A wise old wizard who always seems to know more than he reveals. Gandalf has a vast command of magic and tends to show up at just the moment he is needed most. Though he helps the dwarves in their quest (not least by making Bilbo go along with them), he does not seem to have any interest in their gold. He always has another purpose or plan in mind, but he rarely reveals his private thoughts.

**Thorin Oakenshield** A dwarf who leads his fellow dwarves on a trip to the Lonely Mountain to reclaim their treasure from Smaug. Smaug’s bounty is Thorin’s inheritance, as it belonged to Thror, Thorin’s grandfather, the great King under the Mountain. Thorin is a proud, purposeful, and sturdy warrior, if a bit stubborn at times. As the novel progresses, his inability to formulate successful plans, his greed, and his reliance on Bilbo to save him at every turn make Thorin a somewhat unappealing figure, but he is partly redeemed by the remorse he shows before he dies.

**Gollum** A strange, small, slimy creature who lives deep in the caves of Moria beneath the Misty Mountains. There, Gollum broods over his “precious,” a magic ring, until he accidentally loses it and Bilbo finds it. We never learn exactly what kind of creature he is. Apparently, his true shape has been too deformed by years of living in darkness to be recognizable.

**Smaug** The great dragon who lives in the Lonely Mountain. Years ago, Smaug heard of the treasure that the dwarves had amassed in the mountain under Thror’s reign, and he drove them away to claim the gold for himself. His flaming breath can scorch a city, his huge wings can carry him great distances, and his armorlike hide is almost impenetrable. Smaug can speak and possesses a dark, sardonic sense of humor.

**Bard** The grim human who is the honorable captain of the guard in Lake Town, a human city built on Long Lake just south of the Lonely Mountain. With the help of information discovered by Bilbo and related by a thrush, Bard finds Smaug’s weak spot and kills him.

**Beorn** A man who can turn into a bear, Beorn helps Bilbo and the dwarves after their escape from the goblins.

**Elrond** The great leader of the elves at Rivendell. Elrond gives Bilbo’s group aid and helpful advice when they pass through Rivendell early in the novel. He is described in Chapter 3 as being “as strong as a warrior, as wise as a wizard, as venerable as a king of dwarves, and as kind as summer.”

**Dark Lord Sauron** An evil sorcerer and creator of the magic ring. Also called the Necromancer, Sauron is only mentioned in The Hobbit; he never actually appears.

**Thror** Thorin’s grandfather. Thror mined Moria, a series of caves under the Mountain, and discovered a wealth of gold and jewels. He became King under the Mountain, but before long, the dragon Smaug came and killed or scattered all of Thror’s people. The dragon has been guarding the treasure ever since, and Thorin wants to get back what is rightfully his.

Races

Dwarves Thorin's group, composed of Fili, Kili, Dwalin, Balin, Oin, Gloin, Ori, Dori, Nori, Bifur, Bofur, and Bombur, none of whom is really developed as an individual character in the novel. The narrator describes dwarves unfavorably in Chapter 12, noting their greed and trickery. Some, however, are “decent enough people like Thorin and Company, if you don't expect too much.”

Elves The first creatures in Middle-Earth. Immortal unless killed in battle, they are fair-faced, with beautiful voices, and have a close communion with nature, which makes them wonderful craftsmen. There are actually two different varieties of elves: the wood elves and the high elves. The wood elves reside in Mirkwood and, as a result, have more suspicious and less-wise tendencies than their high relatives.

Humans Humans appear in the settlement of Lake Town near the Lonely Mountain. Tolkien emphasizes their mortality, their lack of wisdom, their discordance with nature, and their rampant feuding, but he does not describe humans as inherently evil in the same way that he characterizes goblins and Wargs.

Trolls Short-tempered and dull-witted creatures who will eat just about anything, the trolls are based on mythological creatures taken from Old English and Anglo-Saxon poems and on figures from popular fairy tales and folklore. Tolkien has them speak with a cockney accent, the dialect of lower-class Londoners, which injects a modern joke into the fantasy epic.

Goblins Evil creatures encountered by Bilbo and company in Chapter 4. Goblins are infamous for their ability to make cruel weapons and torture devices.

Wargs Evil wolves who join forces with the Goblins at the Battle of the Five Armies in Chapters 17 and 18. The Wargs haunt and pursue Bilbo and the dwarves soon after Bilbo acquires the ring.
Analysis of Major Characters

Bilbo

The protagonist and title character of *The Hobbit*, Bilbo is by far the novel’s most important figure. Bilbo’s thoughts, feelings, and actions form the focus of the novel and shape its plot. Bilbo’s central role is underscored by his appeal—he is not only the most important but also the most likable and honorable character. Even as the other participants in his quest become corrupted by greed, Bilbo maintains his common sense, courage, and eagerness to please.

Bilbo’s understated charisma is a quality common to many protagonists in children’s literature. A further quality he shares with many heroes of children’s literature is his small size: as a hobbit, Bilbo is only half the size of a man. At the beginning of the novel, Bilbo is, like most hobbits, comfortable and complacent. He loves food, drink, and security, and he relishes his snug little hole at Bag End, Underhill. But as Gandalf says, there is more to Bilbo than meets the eye. Bilbo is a Baggins, the heir of a thoroughly respectable and conventional family, but his mother was a Took, an eccentric clan of hobbits noted for their love of excitement and adventure.

When Gandalf enlists Bilbo’s help in Thorin’s quest for the treasure under the mountain, Bilbo begins a process of gradual development, transforming from a cautious homebody at the beginning of the novel to a brave and confident hero at the end. As the quest progresses, Bilbo shows a vast reserve of inner cunning and strength and slowly becomes the dominant force holding the group of hapless dwarves together. He saves them from the goblins by shouting for Gandalf, he rescues them from spiders and wood elves in Mirkwood, he finds the way into the mountain, he leads them to the treasure, he discovers Smaug’s weak spot, and he attempts to thwart Thorin’s greed and to bring peace to the feuding dwarves, elves, and humans.

Bilbo’s heroic deeds are all the more remarkable because they fail to change him. He discovers capabilities that had been unknown to him, but he does not become arrogant or relinquish his values. In his final conversation with Bilbo, Thorin acknowledges the value of the simple lives of hobbits, even in a world marked by grim heroism and danger. Though Bilbo learns to thrive in this outer world, he draws strength from the simple source that guided his heroic quest. His decision to return to Hobbiton toward the end of the novel indicates that, despite his newfound heroism, Bilbo has stayed true to himself all along.

Gandalf

Though his history and character are more fully explored in *The Lord of the Rings* and *The Silmarillion*, Gandalf remains a looming mystery in *The Hobbit*, a constant reminder that Middle-Earth is more vast and cryptic than Bilbo realizes. A powerful wizard, Gandalf generally prefers to keep his powers and motives closely guarded. He never reveals, for instance, why he chooses to help Thorin in his quest; he certainly has no interest in the treasure, and he leaves the company in Mirkwood while he goes to fight against the Necromancer. Something both inspiring and dangerous defines Gandalf’s character—he is an unshakable bulwark against evil, and yet he seems to have an enlightened, almost godlike knowledge of every person’s place in the world.

Gandalf’s sweeping, epic personality separates him from the vast majority of characters that commercial fantasy literature has produced in the decades since *The Hobbit* was first published. Though Gandalf can be viewed as the source of the stereotypical figure of fantasy wizard, Gandalf himself is more than just an old man with powerful spells and a pointy hat. Tolkien imbues Gandalf with a sense of heightened awareness, ensuring that Gandalf always knows more about what is happening than we do, even when the other characters are left in the dark.

Thorin

The leader of the dwarves who embark on the treasure quest in Chapter 2, Thorin is in many ways a typical member of his race: brave, stubborn, proud, and greedy for gold. Though his birthright and noble bearing
initially make Thorin seem like a fairly heroic figure, the dwarf's status quickly declines as Bilbo's rises. Soon after Gandalf leaves the party, it becomes apparent that Thorin is not a true leader: he is incapable of formu-
lating a plan, makes hasty and poor decisions, and generally relies on Bilbo to see him through his adventures, all the while treating Bilbo like an insignificant underling. Once Thorin gets his hands on Smaug's treasure, he becomes irrationally greedy and obsessed with wealth, to the extent that he would rather wage a violent war than give the men from Lake Town their fair share of the treasure. Thorin is partially redeemed by his dying apology to Bilbo, but not even this act of remorse can fully redeem him. In general, the arrogant Thorin works as a foil for the unassuming Bilbo, setting off Bilbo's best qualities and creating a leadership void that provides Bilbo the chance to seize the initiative and become a true hero.
Themes, Motifs & Symbols

Themes

Themes are the fundamental and often universal ideas explored in a literary work.

Bilbo's Heroism

The Hobbit's main theme is Bilbo's development into a hero, which more broadly represents the development of a common person into a hero. At the beginning of the story, Bilbo is timid, comfortable, and complacent in his secure little hole at Bag End. When Gandalf talks him into embarking on the quest with Thorin's dwarves, Bilbo becomes so frightened that he faints. But as the novel progresses, Bilbo prevails in the face of danger and adversity, justifying Gandalf's early claim that there is more to the little hobbit than meets the eye.

Bilbo possesses hidden reserves of inner strength that even Bilbo himself cannot perceive when he first sets out on the quest. Confronting the trolls, escaping with Gollum's ring, slaying the spider, rescuing the dwarves in Mirkwood, and speaking face-to-face with the great dragon Smaug all provide Bilbo with opportunities to test his resolve. As he builds confidence and resourcefulness, Bilbo emerges as a true hero.

Because Tolkien acknowledged that the idea of hobbits was rooted in his experiences with rural Englishmen of his own time, Bilbo's development might allegorically represent the heroism of England in World War I or the inner, latent heroism common to everyone. But given Tolkien's stated distaste for allegory—his main motivation for writing was storytelling, not the exploration of a literary theme—it is questionable whether Bilbo's story should be taken to refer to anyone except Bilbo himself.

Race, Lineage, and Character

The differences among Tolkien's imaginary races are a major focus of the novel, particularly in its second half. Elves, dwarves, trolls, and goblins differ from one another physically, psychologically, and morally. These inherent racial differences drastically limit the possibility of individual choice but make moral distinctions easy to maintain. All goblins are evil, for example, and all elves are good. The notion of races having different moral qualities is reflected in the novel's idea of nature. The good races are portrayed as being in harmony with nature, while the evil races are depicted as being at odds with it—hence the eagles' decision to help the elves against the goblins. Some critics have suggested that the different races in The Hobbit were meant to represent different European nationalities, but Tolkien's distaste for allegory makes this seem highly unlikely.

Family lineage is another important factor that shapes identity in The Hobbit. Throughout Middle-Earth, one's prospects, character, and social position are linked closely to family heritage. Bilbo's conflicting feelings of fear and courage, for instance, are portrayed as a struggle between his Baggins side and his Took side, referring respectively to his father's and his mother's families. Thorin is prompted to seek the treasure under the mountain because it is his birthright, passed down from his grandfather, Thror. Bard's heroism is in part attributed to his having descended from the lords of Dale. Whereas race is primarily a determinant of one's moral standing, family has more to do with one's specific personality: Bilbo is good because he is a hobbit, but he is adventurous because he is a Took.

Motifs

Motifs are recurring structures, contrasts, or literary devices that can help to develop and inform the text's major themes.
Contrasting Worldviews

Tolkien was a scholar of ancient languages at Oxford. A major source of inspiration for The Hobbit's plot was the body of ancient epic literature that Tolkien studied, particularly Scandinavian and Anglo-Saxon epics like Beowulf. Elements of the story originate from literature, including the form of the heroic quest, the dragon's treasure hoard, the importance of named swords, the elves' mysterious magic, and the grim focus on birthright and family lineage.

The Hobbit revisits many of these ancient conventions with a playful, comic tone that is thoroughly modern. Bilbo himself, with his common sense, love of peace, and warmhearted self-doubt, is in many ways a rural Englishman of the 1930s transplanted into a medieval adventure. Tolkien's exploration of this contrast between the world in which he lived and the worlds he studied is the source of a large part of the book's comedy. This contrast also has some thematic importance—Thorin's last words to Bilbo indicate that despite the grandeur of epic heroism, the simple modern values of the hobbits perhaps have a more important place in the world.

The Nature and Geography of Middle-Earth

Since The Hobbit takes place in a world of the author's own creation—complete with its own history, language, geography, and mythology—much of the narrative is devoted to incidental descriptions of the places, people, and things that Bilbo encounters. As a result, Middle-Earth emerges as a finely detailed reality with a convincing visual presence and its own unique atmosphere. Taking the reader through this world is one of the primary considerations of the novel, and a great part of Tolkien's literary ingenuity is devoted to making Middle-Earth seem as real as possible. For many readers, experiencing Middle-Earth as a self-contained whole is probably the most striking aspect of reading The Hobbit.

Symbols

Symbols are objects, characters, figures, or colors used to represent abstract ideas or concepts.

Named Swords

Throughout epic literature, swords with names and lineages are the marks of great heroes. One of the most famous examples is King Arthur's sword, Excalibur. The swords named Orcrist and Glamdring that Thorin and Gandalf win from the trolls symbolize their heroic deeds. Bilbo's decision to name his short sword Sting after killing the spider is a major turning point in his quest—it symbolizes his bravery and initiative, and presages his transformation into a hero.

Hobbits

Though the thematic importance of hobbits is highly debatable, Tolkien himself acknowledged that the nature of hobbits was based on the rural, middle-class English people among whom he lived. This symbol enables Tolkien to explore the contrast between ancient and modern worldviews as the modern-minded Bilbo travels the ancient world of Middle-Earth.
Summary & Analysis

Chapter 1: An Unexpected Party

There is a lot more in him than you guess, and a deal more than he has any idea of himself. (See Quotations, p. 26)

Summary

Hobbits, the narrator explains, are little people, roughly half the size of humans, with thick hair on their feet, round bellies, and a love of good food, comfort, and security. Though some hobbits live in houses, they traditionally live in holes in the ground. The holes are not dank and smelly but comfortable, cozy underground dwellings with all the amenities of their aboveground counterparts. The hole occupied by the hobbit known as Bilbo Baggins is called Bag End. It is quite a pleasant dwelling, with comfortable furniture and a well-stocked kitchen, nestled in a snug little village under a hill.

Bilbo’s ancestry is somewhat noble by hobbit standards: his father was from the well-to-do, conventional Baggins family, but his mother was from the Tooks, a wealthy, eccentric family infamous for their unhobbit-like tendency to go on adventures. Despite his Took blood, however, Bilbo prefers to stay at home and live a quiet life.

On the day the story begins, Bilbo is enjoying a pipe outside his front door when an old man with a long cloak and a staff arrives. After the old man introduces himself, Bilbo recognizes him as the wizard Gandalf, who has created spectacular fireworks displays on holidays in Hobbiton, but Bilbo still looks on the old wizard with a suspicious eye. When Gandalf asks if Bilbo would be interested in going on an adventure, Bilbo declines and quickly excuses himself. He invites the wizard to come over for tea sometime but only so as not to seem rude—in reality, he wants nothing to do with Gandalf and his adventures.

When the doorbell rings the next afternoon, Bilbo assumes it is Gandalf. To his surprise, a dwarf named Dwalin pushes past him and promptly sits down to eat. Soon, other dwarves begin to arrive, and as Bilbo’s neat little home becomes crowded with dwarves, Bilbo becomes increasingly confused and annoyed. At last, Gandalf arrives with the head dwarf, Thorin. The thirteen dwarves and the wizard nearly clean out Bilbo’s pantry before finally settling down to discuss their business.

It soon becomes clear that Gandalf has volunteered Bilbo to be a “burglar” for the dwarves on their adventure. The hobbit protests, and the dwarves grumble that the soft little hobbit does not seem suited to their adventure. Gandalf, however, is certain that Bilbo is useful, and insists that there is more to the hobbit than meets the eye.

The wizard then brings out an old map of a great mountain and points to a mysterious secret entrance, a door to which Thorin holds the key. Bilbo demands some clarification about the point of the whole expedition. Thorin explains that his grandfather, Thror, mined the mountain shown on the map and discovered a wealth of gold and jewels. Thror then became King under the Mountain, but his fantastic treasure attracted unwanted attention. Before long, the dragon Smaug came and killed or scattered all of Thror’s people. The dragon has been guarding the treasure ever since. Thorin and the dwarves are out to reclaim their rightful inheritance, even though they are unsure of what to do with Smaug when they find him.

Bilbo suspects that the dwarves want him to play a part in slaying the dragon. Although his Baggins side would like nothing better than to sit at home with his pipe, the Took influence in him fuels his curiosity about the adventure, and he is reluctantly excited by the tales of dragons and treasure and great battles. After looking at the map and discussing the adventure with the company, the hobbit makes up beds for all his guests and then spends the night in troubled dreams.
Analysis

In The Hobbit, Tolkien presents us with a fantasy world of his own creation, complete with its own races, languages, and geography. Tolkien was a language scholar, and he was partially motivated to write his stories by his desire to invent other languages. He implies at the beginning of Chapter 1 that this fantasy world, which he later dubbed Middle-Earth, is somehow connected to our own world, saying that hobbits “have become rare and shy of the Big People,” which is why we no longer see them around.

In The Silmarillion and The Lord of the Rings, Tolkien implies that Middle-Earth is our Earth as it existed millions of years ago, when the continents had very different forms. Thus, Tolkien’s world is as much mythological as it is fantastic. Its larger purpose, like that of Greek and Roman mythologies, is often to reflect truths about our own world that may be better seen when presented in a mythical context. In fact, Tolkien first wrote about Middle-Earth with the intention of creating an entirely new mythology for the English people, and the story’s form is based on the ancient heroic epics that Tolkien taught and studied at Oxford. But The Hobbit is only tangentially connected to Tolkien’s history of Middle-Earth and to the larger mythology that Tolkien would explore in his longer and more ambitious works.

The Hobbit’s tone is much warmer and more humorous than that of most heroic epics, such as Beowulf. Tolkien tested out The Hobbit as he wrote it by reading it to his sons, and the manner of narration is, at times, very much like a children’s story. Its style is extremely playful and conversational, with frequent asides and jokes directed at the audience, including one famous quip about how an ancestor of the Tooks invented the game of golf when a goblin’s head he had chopped off in battle rolled into a hole.

The unlikely pairing of Bilbo with wizards, dwarves, and dragons in the first chapter establishes the contrast between the novel’s historically inspired, mythological subject matter and its lighthearted, modern tone. Much of the humor in the novel’s early chapters stems from this contrast. For example, as the dwarves hold their great feast, Bilbo worries that they will chip his plates and furniture—both Bilbo and the dwarves end up looking slightly ridiculous. The hobbit’s skeptical outlook on his guests and on the adventure mirrors our own outlook, and it enables the story’s more fantastic elements to be introduced in a manner that is more entertaining than explanatory. Tolkien eases us into his fantasy world, so that as Bilbo develops into a bolder and more heroic figure, we also become more familiar with the magical landscape of Middle-Earth.

In the preface to The Lord of the Rings, Tolkien conveyed his distaste for allegory. In the decades after writing The Hobbit, however, he openly acknowledged the link between hobbits and the English people of his own time. There are even many similarities between Bilbo and Tolkien. Like Bilbo, Tolkien enjoyed middle-class comforts—simple food, a pipe, and a quiet life. Like Bilbo, Tolkien had “adventurous blood”—his mother was from a family known for its extensive escapades. In a more general sense, Bilbo can be seen as a gentle caricature of the English—a reserved, quiet people who, nevertheless, can be roused to action when the situation calls for it, a trait Tolkien witnessed firsthand during his service in World War I.

Summary — Chapter 2: Roast Mutton

Bilbo wakes up rather late the morning after Gandalf’s visit. He is surprised—and a little relieved—to see that the dwarves have left without him. He is just sitting down to a quiet breakfast when Gandalf enters and rushes him off to the Green Dragon Inn, in Bywater, where Thorin and the rest of the dwarves have been waiting to begin their journey. As they head east on the main road, Bilbo sulks at having to leave without finishing his second breakfast or making proper preparations. It begins to rain. By the time dusk approaches, the whole company is tired, hungry, ready to camp, and annoyed at Gandalf’s mysterious disappearance earlier in the day.

Suddenly they see what looks like the light of a fire in the distance. They move closer to investigate it, and Bilbo sees three huge trolls sitting around a fire, eating mutton. Bilbo tries to make off with one of the trolls’ money purses, but they hear the noise and grab him. The trolls will eat just about anything, but they are also short-tempered and dull-witted. They proceed to fight about how to interrogate Bilbo.
The commotion attracts the dwarves, who come to the clearing one at a time. The trolls stop fighting just long enough to hide in the trees and throw a sack over each approaching dwarf. Soon, they have everyone tied up except Bilbo, who they've forgotten. The trolls decide to cook the dwarves immediately, but then a voice, which sounds like one of the trolls, starts an argument, and the three trolls start fighting again. His fighting goes on for quite some time until the trolls notice that it is almost dawn. The sun peeks over the horizon and the trolls all freeze—sunlight turns trolls to stone.

Gandalf then steps triumphantly into the clearing. He had been throwing his voice to mislead the dwarves and to keep the trolls arguing until morning. He and Bilbo release the dwarves, who are shaken but otherwise unharmed. Searching nearby, they find the trolls' cave and a number of well-wrought weapons, which they take as payment for their pains.

Summary — Chapter 3: A Short Rest

As the company sets off the next morning, Gandalf explains that he has checked the road ahead up to the last safe stop along their way. This stop is Rivendell, a city of elves located just beyond the Edge of the Wild, near the foothills of the Misty Mountains, which the company will have to pass. As the company approaches Rivendell, a number of elves approach them and invite them back to eat and rest. During their stay, they meet Elrond, the great chief elf, who is “as strong as a warrior, as wise as a wizard, as venerable as a king of dwarves, and as kind as summer.”

Elrond can interpret the ancient runes, or markings, found on the company's new weapons and on Thorin's map of the mountain. The swords taken from the trolls, he tells them, are renowned goblin-killers from the great wars between the elves and the goblins. Gandalf’s sword is called Glamdring, and Thorin’s is named Orcrist. On Thorin's map, Elrond is able to read moon-letters—writing visible only in the light of the moon in the proper phase—that describe how to find the secret entrance on the Lonely Mountain. Though they are puzzled by the message, the group is in high spirits when they depart from Rivendell. Everyone is well rested and prepared for the road ahead.

Analysis — Chapters 2–3

Bilbo's impulsive bravery in the troll camp—including his burglarlike attempt to steal a money purse—begins his figurative transformation from an introvert to an adventurer. Though Bilbo is relieved when he thinks the dwarves have gone on without him, by the end of Chapter 2, he has already begun to prove Gandalf’s claim that there is more to Bilbo than meets the eye. Over the course of the novel, Bilbo gradually sheds his modern complacency and becomes more courageous and adventurous.

In the characters of the trolls, Tolkien combines characteristics of mythological creatures taken from Old English and Anglo-Saxon poems with those of popular fairy tales and folklore. The dwarves' one-by-one approach to the troll camp subtly alludes to the sequential narratives of children's fables like “The Three Billy-Goats Gruff,” which also features a group's one-by-one confrontation with a troll. Tolkien also injects some modern humor into the story by giving the trolls cockney accents, the dialect of lower-class Londoners: “Mutton yesterday, mutton today, and blimey, if it don’t look like mutton again tomorrer.”

The swords that the company steals from the trolls' cave are a link to the tradition of heroic epic on which so many aspects of The Hobbit are based. Great swords that have mythic lineages and heroic names are characteristically present in heroic epics, the most famous example being King Arthur’s legendary sword, Excalibur. The possession of a named sword is a symbol of heroism and prowess in battle, and for this reason, it is significant that Bilbo's short sword is not named yet. As we shall see, after Bilbo performs some deeds more worthy of his quest, he names his sword.

In The Silmarillion, the swords are described as having been made for the goblin wars of an earlier age of Middle-Earth, in which the elves fought off the goblins. There is no question of which side was good and which evil—the evil nature of the goblins is described in Chapter 4, and the good nature of the elves is obvious from the glimpse we get of them at Rivendell in Chapter 3. Elves were the first creatures in Middle-Earth: they are immortal unless killed in battle; they are fair-faced, with beautiful voices; and they have a close communion with nature, which makes them skillful craftsmen. The unique magic of the swords, as Elrond tells the company in Chapter 3, is that they glow with a blue light when goblins are near.
Chapters 4–5

Summary — Chapter 4: Over Hill and Under Hill

Bilbo and company advance upon the Misty Mountains. Thanks to Elrond's and Gandalf's advice, they are able to find a good pass over the mountain range among the many dead-end trails and drop-offs. Still, the climb is long and treacherous. A violent thunderstorm breaks suddenly, forcing them to find shelter. Luckily, two of the dwarves (Fili and Kili) find a cave in a side of the mountain. They bring in the ponies and make camp for the night.

In the middle of the night, Bilbo wakes with a start, just in time to see the ponies get dragged into an enormous crack that has opened in the cave wall. He yells, and out of the crack jump dozens of goblins, who tie up and carry off each member of the company except Gandalf, who was forewarned by Bilbo's yell.

The goblins carry the dwarves and the hobbit down into the mountain to a huge chamber where the Great Goblin sits. He demands to know what the travelers are doing in his mountain. Thorin tries to explain about the storm, but one of the goblins brings forth the sword that Thorin took from the trolls, which he was carrying when captured. His sword, Orcrist, the goblin-cleaver, is well-known among the goblins.

The goblins go into a rage and the Great Goblin lunges at Thorin to eat him. Suddenly, the torches lighting the cavern go out and the great fire in the middle of the chamber throws its sparks onto the goblins. In the darkness and confusion, a great sword flashes and strikes down the Great Goblin. Then a voice guides the captives out of the cavern. It is Gandalf, who leads the dwarves through the passages and deeper into the mountain. The goblins follow quickly after them, and one of the goblins catches up to the dwarf Dori, who has been carrying Bilbo on his back. Bilbo falls off, strikes his head on the ground, and loses consciousness.

Summary — Chapter 5: Riddles in the Dark

When Bilbo regains consciousness, he can see nothing in the darkness. Feeling around on the floor, he happens to come across a ring, which he puts in his pocket. He has no idea where the rest of the company is, or in which direction the exit lies. Picking the path he feels he had been traveling with the dwarves, he soon comes across an underground lake. There, he discovers a strange creature named Gollum. When Gollum sees Bilbo prowling around, obviously lost, he is interested and a bit hungry, so he approaches the hobbit. Bilbo brandishes his sword when he hears Gollum's hissing voice.

Gollum does not wish to contend with the sword, so he proposes a riddle game. If Gollum's riddle stumps Bilbo, he will eat Bilbo, but if Bilbo's stumps Gollum, Gollum will show Bilbo the way out of the mountain. Bilbo has no choice but to agree, and they begin asking each other riddles. In the end, Bilbo wins through a bit of trickery. Referring to the ring he had found, he asks, "What have I got in my pocket?" and Gollum cannot guess the right answer. Gollum, however, does not intend to let his meal get away so easily. He goes to his island in the middle of the lake to get his "precious," a golden ring that makes its wearer invisible—the very ring that Bilbo had found.

Unable to find the ring, Gollum suspects the hobbit of stealing it and runs at him in a rage. Through sheer luck, Bilbo happens to slip on the ring, and Gollum runs right past him. Realizing the ring's power, Bilbo follows Gollum, who heads toward the exit thinking that Bilbo is ahead of him. When Gollum gets near the exit, he stops because there are goblins crowded around it. Bilbo leaps over him, runs past the goblins unnoticed thanks to the ring, and just barely manages to squeeze through the door into freedom and fresh air.

Analysis — Chapters 4–5

The uniform wickedness demonstrated by the goblins in Chapter 4 affirms the connection between race and moral tendencies in Tolkien's fantasy world. The different races of Middle-earth possess specific moral characteristics, so that goblins, who are infamous for their ability to make cruel weapons and instruments of torture, are evil, and elves are good. There are no exceptions. The races of Middle-earth also possess qualities
that have little direct bearing on their overall moral standing. Hobbits love food, for instance, and dwarves love gold. A gain, there are no exceptions.

The characteristics of the races result primarily from the mythic theology of Middle-Earth. Under this theology, the gods create certain creatures for very specific purposes. Each race also has a particular relationship with nature. Of the various characters Tolkien depicts, Bilbo seems to be the only one capable of making complex moral choices that test the boundaries of his race.

Bilbo’s heroism is somewhat dubious, for though he behaves heroically, his acts seem to be the result of luck, or else destiny, rather than effort on his part. He seems to have a knack for being in the right place at the right time. In his first encounter with the goblins, for example, Bilbo proves useful by shouting enough to awaken Gandalf, who, in turn, ends up saving the whole company. Bilbo is credited for helping the whole party when his companions were unable to do so, even though it was only his chance awakening that enabled him to warn everyone.

Bilbo’s unintentional heroism is most evident in his discovery of the magic ring. In the history of Middle-Earth, this discovery is the most important event in the novel. Though neither Bilbo nor Gollum (the ring’s previous holder) are aware of it, the ring is in fact an object of awesome power. Created by the Dark Lord Sauron, who appears in The Hobbit as the Necromancer of Mirkwood, the ring is central to Sauron’s attempt to conquer and corrupt the world. The ring is pivotal to the plot of The Lord of the Rings. In The Hobbit, its greater importance is only hinted at when Tolkien cryptically comments that Bilbo’s discovery of the ring is a turning point in his career.

Gollum’s whiny, hissing style of speech marks him as one of the novel’s most unique and memorable characters. Gollum’s riddle game is itself another example of Tolkien’s interaction with epic literature in The Hobbit. Riddles and riddle games are familiar features of Anglo-Saxon and Scandinavian epics, in which heroes are defined almost as much by their prowess with words as they are by their prowess with swords. In fact, many of the riddles exchanged by Bilbo and Gollum come directly from ancient Scandinavian and Anglo-Saxon poems. Bilbo’s victory in the riddle game is an important step in his development, but the eccentric manner in which he wins is closer to that of modern comedy than to that of ancient epic. Bilbo baffles Gollum with the question, “What have I got in my pocket?,” which is, of course, not a true riddle at all. A true riddle must contain clues necessary to solve it. Gollum, with his purely ancient sensibilities, cannot even challenge Bilbo’s question, let alone answer it.

Chapters 6–7

Summary — Chapter 6: Out of the Frying-Pan into the Fire

Fleeing from the goblins—and still invisible, thanks to the ring—Bilbo looks back and realizes that he has made it to the other side of the Misty Mountains. The tunnels have taken him all the way through the range. Walking along, he stumbles upon Gandalf and the dwarves, who have just been wondering whether they should leave without him. The hobbit slips off the ring and surprises them and then explains how he made his way out of the mountain. However, he refrains from mentioning his discovery of the magic ring and the role it played in his escape from Gollum and the goblins.

Gandalf implores the company to get moving again since only the sunlight is keeping the goblins from coming after them. The group is a bit north of where they had planned to be, and they have difficult country to cross. Evening comes as they pass through a grove of trees. Suddenly, they hear the howling of wolves and barely have time to scurry up into the trees before the wolves descend upon them. The beasts are actually wolflike creatures called Wargs. The Wargs are allies of the goblins, and they quickly notify the goblins of the situation. The goblins begin to arrive and, laughing at the company’s predicament, light fires under the trees in which Gandalf, the dwarves, and Bilbo are hiding.

Gandalf prepares to attack the goblins, hoping to kill as many as he can before they kill him. Luckily for the company, the Lord of the Eagles has seen the commotion from his roost high in the mountains. With a number of other eagles, he swoops down, picks up the marooned travelers, and flies them to safety. The eagles are friends of Gandalf’s and enemies of the goblins. They are happy to provide food and rest for the weary travelers, who then continue on their journey.
Summary — Chapter 7: Queer Lodgings

Once again, Gandalf disappoints the company by announcing that he must leave. He says, however, that he will stay around long enough to help them find food and ponies so that they can make their way on their own through Mirkwood—the last great obstacle before the Lonely Mountain. He leads them to the house of Beorn. Beorn is a half-man, half-bear creature who has a great wooden house in the middle of the woods outside Mirkwood. Gandalf takes the dwarves to Beorn’s house a few at a time, so as not to startle him. He tells Beorn the story of their adventure in the mountain. Gandalf’s story amuses Beorn greatly because he despises goblins, who are enemies of nature.

Beorn offers the company much-needed food and lodging. He also does some scouting and finds that the Wargs and goblins have put together an attack party in order to find the dwarves and wizard that killed their leader, the Great Goblin. To evade this attack party, Beorn recommends that the group take the northern pass (the elf path) through Mirkwood, which will bring them near the Lonely Mountain. This choice will throw the goblins off the company’s trail and allow them to bypass the dangerous southern pass. The northern pass is not entirely safe either, so Beorn repeatedly warns his guests never to stray from the path.

Beorn provides the group with food and ponies to carry them to the gate at the path’s start. From there, however, they must return the ponies and travel on foot. When they reach the path, Gandalf also departs, wishing his friends the best and reminding them never to stray from the path—dark things lurk in Mirkwood that even the wizard does not know about. On that note, the dwarves and the hobbit plunge into the forest.

Analysis — Chapters 6–7

Although the eagles and Beorn help the company tremendously, they both express that hatred for goblins, rather than love for dwarves, is their main reason for helping the company. Neither Beorn nor the eagles have any interest in the dwarves’ gold, but as representatives of pure nature, they are the sworn enemies of corrupted nature, represented by the goblins and Wargs. The eagles generally keep distant from the affairs of other races, and Beorn can be downright cruel to those who displease him. When he finds a goblin and a Warg prowling about in the woods, for instance, he puts the goblin’s head on a stake and the Warg’s pelt on a tree outside his house as a warning. Beorn and the eagles show all the brute force of nature and, in fact, seem to be part of it. Gandalf surmises that, long ago, Beorn was born from the mountains themselves.

By the end of Chapter 7, the episodic nature of The Hobbit narrative becomes increasingly clear. Like successive episodes of a popular television show, each chapter brings a new setting and a new set of adventures. Chapter 2 involved the trolls, Chapter 3 introduced us to Elrond and Rivendell, Chapter 4 involved the goblins, Chapter 5 chronicled Bilbo’s encounter with Gollum, and so forth. Once an adventure is completed, it generally has relatively little bearing on the rest of the novel. The one continuous thread, however, is that the changes Bilbo undergoes as a result of each adventure affect his behavior in subsequent adventures.

Moreover, until the group nears its destination at the Lonely Mountain, the particular adventures that they face have little to do with their ultimate goal of regaining Thorin’s treasure. Dangers like the goblins and the tempest are merely incidental obstacles the characters encounter on the way to their destination. These impediments make up The Hobbit’s cast of antagonists, each of whom predominates in a single adventure. Examples of particular antagonists include the Great Goblin, the spiders of Mirkwood, and the great dragon Smaug.

The novel’s overall tone grows darker and more ominous the farther the company travels, so that the solace they find in Beorn’s lair after escaping the goblins seems grim and violent compared to the solace they found in Rivendell after escaping the trolls. Even after the company escapes the goblins, the coming journey into Mirkwood seems so perilous that the road ahead seems more frightening than the road behind. This gradually darkening tone builds tension. It also transforms the novel’s dynamic from a lighthearted children’s story into a more serious epic. This gradual change corresponds to the reader’s immersion into the tale and to Bilbo’s transformation into a true hero. As Bilbo travels farther from the safe and familiar comforts of Hobbiton, the dangers he faces heighten, and he evolves from a humble hobbit into a noble protagonist heroically negotiating his way through evil.
Chapters 8–9

Summary — Chapter 8: Flies and Spiders

Somehow [after] the killing of this giant spider . . . [h]e felt a different person, and much fiercer and bolder in spite of an empty stomach, as he wiped his sword on the grass and put it back into its sheath.

(See Quotations, p. 26)

Darkness falls upon Bilbo and the dwarves as they enter the bleak forest of Mirkwood. Strange eyes peer out at them from the trees. Soon, the group cannot tell night from day. Everyone can think only of getting out of the stuffy, ominous woods, but there seems to be no end in sight. A few days later, they come to a stream that Beorn had warned them not to touch. They cross using a boat already moored there, but a dwarf, Bombur, falls in and is put into a sleep that lasts for days. The rest of the party is forced to carry him. Hungry, tired, and scared, they begin to despair.

One night, they see a flicker of lights in the trees, and ignoring the warnings of Beorn and Gandalf, they leave the path and move toward the lights. They see elves sitting in a clearing around a fire, feasting and singing. However, the moment they burst into the clearing, the lights are snuffed out, and the dwarves and Bilbo can hardly find one another. The same thing happens twice more. On the last occasion, everyone becomes separated, unable to find one another in the darkness. Soon, Bilbo stops hearing voices and, exhausted, leans against a tree to sleep.

When Bilbo awakens, his legs are bound with sticky thread and an enormous spider is advancing toward him. Whipping out his sword, he slashes his legs free and slays the spider. Flush with victory, he gives his sword a name: Sting. He then goes in search of the dwarves. To his horror, he finds them all hanging from a tree, tied up in the webs of the many spiders that sit atop the branches. Bilbo whips a few stones at the spiders and then leads them away from the dwarves by yelling. Fortunately, he is wearing the ring all the while, so the spiders cannot find him.

Having led the spiders away, Bilbo slips back and cuts the dwarves free. But the spiders soon return, and the dwarves, weak from the spiders' poison, can hardly fight them off, even with the aid of the invisible Bilbo. Just when the situation looks completely hopeless, the spiders suddenly retreat, and the company realizes that they themselves have retreated into one of the clearings used by elves. There, they rest to ponder their next course of action. A moment later, they realize with a shock that Thorin is missing.

Unbeknownst to the others, Thorin was taken prisoner by the elves when he stepped into the clearing before the spider attack. The elves are wood elves, who are good but suspicious of strangers. The Elvenking questions Thorin about his journey. When Thorin refuses to say where the company is going for fear that the elves will demand a share, the elves throw him in the dungeon, but they feed him and are not cruel.

Summary — Chapter 9: Barrels out of Bond

Soon after Bilbo and the rest of the dwarves escape the spiders, they are surrounded by a company of wood elves and brought blindfolded to the Elvenking's halls. Bilbo, still wearing his ring, remains undetected. The other dwarves are brought before the king and questioned. Like Thorin, they refuse to reveal their plan to reclaim the treasure from Smaug for fear that the elves will demand a share. Also like Thorin, the dwarves are thrown into the dungeon. Meanwhile, Bilbo, having followed the captured dwarves, walks invisibly through the halls, whispering to the dwarves in their cells and plotting an escape.

The elves exchange goods with the men of Lake Town via barrels that are floated on a river that flows under the elves' dwelling. Empty barrels are sent floating back down the river from a storeroom. In the storeroom, Bilbo catches a guardsman napping. He steals the guardsman's keys, frees the dwarves, and puts his plan into action. He helps pack each dwarf into an empty barrel just before the elves return and shove the barrels into the river; then, still invisible, he hops onto an empty barrel. The trapdoors open and the dwarves speed out along the river toward Lake Town.
Analysis — Chapters 8–9

A key turning point in Bilbo’s development comes when he kills the spider that wrapped him in its web as he slept. After killing the spider, Bilbo feels like “a different person.” The spider is the first enemy that Bilbo defeats in combat, and the incident serves as a rite of passage. This change is marked by Bilbo’s decision to name his sword. In ancient epic literature, named swords are important symbols of courage and heroism, so by giving his sword a name, Bilbo signifies his new capacity to lead and succeed. From this point on, Bilbo begins to take action and make plans on his own—his plan to free the dwarves from the wood elves is the first instance of his newfound resolve. The peril and enmity that Bilbo and his group encounter in Mirkwood, combined with Gandalf’s absence and the dwarves’ bad luck, provide Bilbo with a grand opportunity to continue his development into a hero.

The narrator’s description of the wood elves as “Good People” who have become less wise, more suspicious, and more dangerous than the high elves, their relatives, illustrates how race and moral condition are closely linked in Tolkien’s Middle-Earth. We have not yet encountered any humans in The Hobbit, so it is still difficult to figure where humans fit within Tolkien’s hierarchy of good and evil. From the passing references that we do hear, we get the impression that humans are mortal, often unwise, out of accord with nature, and prone to feuding. Still, humans do not seem to be uniformly evil like the goblins and the Wargs. Soon, at the end of Chapter 9, we encounter more substantial evidence of man when the company, waterlogged but alive, floats toward the human settlement Lake Town, just south of the Lonely Mountain, which is the group’s ultimate destination.

An evil aura pervades the forest of Mirkwood. As Gandalf explains, the evil atmosphere stems mostly from the presence of the mysterious Necromancer in the south of Mirkwood. The Necromancer does not figure in The Hobbit in a significant way but provides another important link between this novel and The Lord of the Rings. The Necromancer later proves to be Sauron, the Dark Lord, who is rebuilding his evil power in Mirkwood before returning to his stronghold of Barad-Dur in the blighted land of Mordor.

Chapters 10–11

Summary — Chapter 10: A Warm Welcome

The barrels, with one hobbit on top and thirteen dwarves inside, flow down the river and out of Mirkwood forest. Looking to the north, Bilbo sees the Lonely Mountain, the group’s ultimate destination. For the time being, however, the river takes them toward Lake Town (its alternate name, Esgaroth, is mentioned in Chapter 12). Lake Town is a human city, built on Long Lake, south of the Lonely Mountain. At Lake Town, the barrels are brought to shore when boats from the town row out and cast ropes toward the floaters, and while the men are away, Bilbo frees his companions from the barrels. Everyone has survived, but they are cramped, wet, and hungry.

Thorin, filled with a new sense of purpose, strides proudly up to the town hall and declares to the Master of Lake Town that he, a descendant of the King under the Mountain, has returned to claim his inheritance. The people of the town rejoice. They have all heard the stories of how gold flowed down the river when the King under the Mountain reigned before Smaug came. They treat the dwarves and even Bilbo like kings. After a fortnight, the company is strong and eager again. Though they still have no idea how to deal with the dragon, Thorin feels that they cannot wait any longer. He obtains boats, horses, and provisions from the Master of Lake Town, and the company sets off up the River running toward the Lonely Mountain.

Summary — Chapter 11: On the Doorstep

As they approach the foothills of the Lonely Mountain, the land turns bleak and barren. All greenery and other living foliage have been burnt away by Smaug. When they reach the foot of the mountain, Bilbo and three dwarves are sent to investigate the main entrance on the south side. The entrance looks far too dangerous—it is the gate that Smaug uses—so the company decides to search out the secret door described on their map, which is on the west side of the mountain.
After hours of searching, Bilbo finally locates a narrow passage along a cliff that leads to a flat, smooth patch on the mountain’s side. Though the patch must be the door, the dwarves cannot find a way to open it, as they have forgotten the message that Elrond read from the map. The dwarves bang at the door with picks and axes, but to no avail. They grow discouraged.

One evening, Bilbo is sitting outside the door, lost in thought, when a thrush lands nearby and begins to knock a snail against a stone with its beak. Suddenly, the hobbit remembers the riddle on the map. He quickly gathers the other dwarves by the door, and they watch as the sun slowly sets. With the sun’s last light, a single ray falls on a part of the door, and there a rock falls away to reveal a keyhole. Thorin quickly takes the key that came with the map and places it in the rock—when he turns it, the door’s outlines appear. The dwarves and the hobbit push open the door and stare into the depths of the mountain before them.

Analysis — Chapters 10–11

The way in which Thorin Oakenshield’s name and the name of his grandfather command immediate respect in Lake Town despite Thorin’s tattered appearance highlights the importance of ancestry and family name in Middle-Earth. We have already seen the importance of lineage in defining a person’s character and prospects, first through Bilbo’s oscillation between his Took side and his Baggins side, and also through Thorin’s obsession with his birthright, the treasure under the mountain. When the party arrives at Lake Town, we see that lineage also influences social interactions. Since strangers often bring trouble, a well-known name is powerful. A mark of social and familial stability, a name like Oakenshield represents a time when peace and prosperity prevailed. For the people of Lake Town, the return of the grandson of the King under the Mountain recalls a time before Smaug when gold came from the Lonely Mountain.

The introduction of the people of Lake Town places humans in Tolkien’s hierarchy of good and evil races. The human denizens of Lake Town are quite cautious when it comes to confronting the dragon. When the company sets off for the mountain, the humans refuse to go near it, leaving Bilbo and the dwarves to fend for themselves. Though they are concerned most about themselves, the people of Lake Town cannot really be blamed for fearing Smaug—they are convinced that he is invincible. Though Tolkien here emphasizes human fallibility and fear, he portrays humans as generally good creatures.

With the riddle of the secret door, Tolkien draws his readers into the story by presenting a confusing puzzle that we attempt to solve before the characters do. Tolkien employs this device often—we have already seen it in the riddle game between Bilbo and Gollum. At the mountain, we have an even greater advantage over the characters. The company has passed through many dangers since their last night in Rivendell, where Elrond interpreted the moon runes on the map for them, explaining that the door could open only on Durin’s Day, one of the last days of autumn. Except for Bilbo, they have quite forgotten the message about “when the thrush knocks . . .”

We are more likely to have the message fresh in mind, however, especially since the narrator notes several times in Chapter 11 that “Autumn was now crawling towards winter.” The difference between the reader’s knowledge and the characters’ ignorance, a situation of dramatic irony, adds to the suspense and urgency of the moment Bilbo figures out the secret of the door. Tolkien builds tension toward the descent into the mountain and the characters’ confrontation with Smaug by playing upon our desire for the characters to realize what we already know.

Chapters 12–13

Summary — Chapter 12: Inside Information

Dwarves are not heroes, but calculating folk, with a great idea of the value of money; some are tricky and treacherous and pretty bad lots; some are not, but are decent enough people like Thorin and Company, if you don’t expect too much. (See Quotations, p. 26)

The dark passage into the mountain stands open before the company. Thorin nominates Bilbo, the official burglar, to go inside to snoop. Bilbo enters, slips on his ring to make himself invisible, and proceeds down the long, dark passage into Smaug’s lair. There, he sees the magnificent, terrible dragon asleep on piles of trea-
sure. Smaug is red and gold, with fiery breath, sharp claws, and a hide as strong as a diamond. Bilbo is horri-
ably afraid, but he works up the nerve to take a single golden cup from one of the piles. He then rushes back up
to the dwarves, who marvel over the cup.

Bilbo's theft does not go unnoticed by Smaug, who takes careful account of his treasure. When he awak-
ens, he is enraged to discover that the cup is missing. He flies around the mountain breathing blasts of flame,
and when he sees the company's ponies at the foot of the mountain, he chases the ponies down and devours
them. Meanwhile, the dwarves and Bilbo huddle inside the secret passage, terrified. After a while, Smaug
returns to his den and falls asleep. The hobbit works up the nerve to return to the dragon's lair, only to dis-
cover that the dragon has been feigning sleep. The terrible creature is wide awake, and Smaug is waiting for
Bilbo.

Although he cannot see Bilbo because of the ring, Smaug smells Bilbo and greets him mockingly. Bilbo is
smart, though, and answers Smaug only in riddles, which amuses the dragon enough to quell his anger for a
while. Cleverly, the hobbit flatters Smaug into displaying his thick-skinned underbelly, revealing an open
patch in Smaug's scaly armor above his left breast.

Bilbo rushes back up the passage, just outrunning the dragon's angry flames. The hobbit tells the dwarves
all that he has learned while a thrush sits nearby and seems to listen. They then hear the roar of the dragon
once more and shut the door to the passage just before an avalanche comes down upon it. They are trapped
inside the mountain.

Summary — Chapter 13: Not at Home

Smaug guesses from Bilbo's riddles that the company is somehow involved with the men of Lake Town, so he
flies there to wreak vengeance. The hobbit and dwarves cower in the dark passage until they can bear it no
longer. They slowly creep down toward Smaug's chamber. When Bilbo determines that the beast is gone, the
dwarves run out to the treasure in glee, remembering the prosperous times of old. Bilbo takes only a few
things. One of them is the Arkenstone, an incomparable gem that Thorin seeks but which the hobbit decides
to keep for himself. Bilbo also finds a marvelous coat of mail made of mithril, a wonderfully strong, light
metal that is scarcer and more valuable than silver or gold.

After the excitement has died down, Thorin leads the company through the passages of the mountain and
out the main gate at the source of the River Running. They still have no idea what to do about Smaug when he
returns. In the meantime, they are desperately hungry, so they follow the river down from the mountain to an
old guard-post cavern that has not been used since the days of Thror, Thorin's grandfather. There, they rest,
eat, and wonder where the dragon has gone.

Analysis — Chapters 12-13

As the dwarves get closer to their long-lost treasure, they become more stubborn (as when they refuse to talk
to the Elvenking), and they make poorer decisions (as when they leave the path in Mirkwood). They have
come to rely almost entirely on Bilbo for common sense and for salvation from the results of their own blun-
ders, and the dwarves' increasingly hardhearted haplessness gives Bilbo no choice but to further develop his
newfound qualities of initiative, courage, and heroism. Bilbo is concerned about the next step of the quest, but
all he can do is get the greedy dwarves away from the gold in Smaug's chambers so they can look for a safer
place to rest. His frustration with the dwarves' stubborn recklessness prompts Bilbo to take and conceal the
Arkenstone, the gem that Thorin covets.

Although Bilbo's motives for taking the Arkenstone are unclear, the narrator explains the dwarves' eager-
ess to plunder by telling us that the one love of all dwarves is money. Whether dwarves are good or bad, one
cannot expect much more from them. This is not exactly glowing praise, and as the tale progresses and the
dwarves' greed leads them to increasingly arrogant and foolish behavior, we are inclined to feel even less sym-
pathy for dwarves and even more sympathy for Bilbo. The treasure fills Thorin, in particular, with pride and
stubbornness, but despite his lofty rhetoric, he fails to offer any practical plan for dealing with the dragon.
Like the other dwarves, he leaves this problem entirely to Bilbo while continuing to act like the party's
unquestioned leader.
Smaug's character fuses elements from ancient epic literature with far more modern traits. Smaug has all the characteristics of legendary dragons, including an armorlike scaled hide, a love of treasure, and the ability to breathe fire. However, he also possesses a dark sense of humor that is thoroughly modern and an almost magical gift of speech that allows him to glean more information from Bilbo than the clever hobbit intends to give. His speech is so persuasive that he even makes Bilbo doubt, briefly, whether the dwarves are actually going to give him his share of the profits. This doubt may also play a role in Bilbo's decision to keep the Arkenstone.

In Chapter 13, Thorin's explanation for the thrush's interest in Bilbo's information about Smaug's weak spot is not idle talk. Thorin says that certain birds in the area were once used as messengers because of their peculiar ability to communicate with certain men. Thorin's comment foreshadows the dramatic events of the next chapter, in which Bilbo wins over the dragon in a battle of wits. Once again, Gandalf is proven wise for having foreseen that a simple hobbit could succeed using cleverness whereas a mighty warrior would have likely failed using might.

**Summary — Chapter 14: Fire and Water**

The narrator suspends telling the story of Bilbo and the dwarves at the mountain and focuses on Smaug as the dragon flies toward Lake Town to wreak vengeance. The people of Lake Town see the dragon coming from a long way off (some think at first that his fire is the river running with gold) and prepare archers and many buckets of water to douse the coming flames. Their readiness is of little help, for Smaug flies over the town and lights every roof on fire. The men's arrows bounce harmlessly off the dragon's diamondlike hide. When most of the men have abandoned the city, one man, Bard, the captain of the archers, readies his last arrow. Suddenly, a thrush lands on his shoulder and speaks in a language he can understand. The bird tells Bard to watch for the dragon's weak spot in the hollow of his left breast. Bard looks, sees the open patch, and lets fly his arrow. It plunges through the chink in the dragon's armor and buries itself in his heart. The beast comes crashing down, destroying the rest of Lake Town as he dies. Bard manages to dive safely into the water and join the rest of his people, who are mourning the dead and their lost town. Some blame the dwarves for waking the dragon, but most assume that they too are dead. Then the lake men remember the gold in the Lonely Mountain, and they think eagerly of how the wealth could rebuild their town.

News of Smaug's death spreads quickly. It reaches far and wide, bringing the Elvenking and an army of elves, who stop at Lake Town to lend aid. The humans and elves then gather together in a single army and march toward the Lonely Mountain. Most of them expect to find a massive treasure left unattended.

**Summary — Chapter 15: The Gathering of the Clouds**

Meanwhile, the thrush returns to the company on the mountain. Finding that they cannot understand its speech, the thrush brings an old raven that can speak in the common tongue. This bird informs Bilbo and the dwarves of Smaug's death, and they rejoice. However, their rejoicing is short-lived, as the raven goes on to describe the huge army of humans and elves marching toward them, as well as the suffering of Lake Town's people, who surely deserve some share of the massive treasure in the mountain. Thorin regards the treasure as his inheritance and plans to fight for it, however, regardless of what the people of Lake Town have suffered.

Under Thorin's orders, the company retreats to the mountain and fortifies it by building a formidable wall at the main gate. From there, they watch as Bard and representatives of the elves approach. Bard informs them that he killed Smaug and that Lake Town has been destroyed. He asks that the dwarves be generous in sharing the wealth of the mountain, since they have benefited so much at the expense of the humans. Thorin flatly refuses. He feels that he owes the humans nothing since the gold belonged to his people originally. Bard gives Thorin some time to reconsider, but Thorin will not change his position. The mountain is declared besieged: nothing and no one will be let in or out if elves and men can help it. Bilbo, for his part, would gladly share the treasure. He is entirely discouraged by the whole turn of affairs. However, no dwarf questions Thorin, and the hobbit has no say in the dwarves’ decision.
Analysis — Chapters 14–15

Bard, the only human hero in *The Hobbit*, is grim, courageous, and honorable. Bard's descent from the people of Dale— who lived in peace with Thorin's ancestors in happier times, before Smaug— allows him to hear the words of the thrush that communicates Bilbo's message. Bard is brave enough to be the last man standing in the town and skilled enough to kill Smaug with a shot. Bard is kind and reasonable, presenting the demands of the men and the elves as politely as possible to Thorin and asking only for what is needed to rebuild Lake Town and help alleviate his people's suffering.

After they find the treasure, the dwarves' disturbing greed escalates to the extent that Thorin seems more like a villain than a hero by Chapter 15. We sense that poor Bilbo, as an ally of the dwarves, is stuck on the wrong side of the conflict. When the elf and human armies advance to propose that the treasure be shared, the narrator observes that Thorin's lust for gold has been building ever since he entered the dragon's lair. This lust has made Thorin and most of the other dwarves totally unreasonable. We are told that only Bombur, Fili, and Kili do not completely share Thorin's stubbornness.

More than simply criticizing the dwarf race, Tolkien's depiction of the dwarves' insensitivity also serves as a warning against the destructive power of greed, which has turned those who were once friends—the dwarves under the mountain and the men of Dale— into enemies. Humans, dwarves, and elves who are all "Good People," ought to be on the same side in Middle-Earth, and their common enemy ought to be evil creatures, such as the goblins. Such was the case while the dragon was alive, but now that Smaug is out of the way, lust for gold blurs the proper lines between good and evil.

In a sense, Bilbo's desire for peace and his generous desire to share the treasure is another mark of *The Hobbit*'s swerving between the modern and ancient epic traits that shape his character. Bard's slaying of the dragon is thoroughly drawn from epic literature, but Bilbo's desire for a peaceful outcome to the conflict would be hard to find in Anglo-Saxon literature. In ancient Anglo-Saxon and Scandinavian epics, gold and treasure were treated with the same seriousness and reverence that is exhibited by the dwarves. Though the source of *The Hobbit*'s characters' reverence for gold is different—gold in epic literature is valuable as much for its ability to create social stability as for its purchasing power—the strife that treasure creates mirrors the conflict found in epics like *Beowulf*. Bilbo's desire for understanding and sharing is a sign that, having explored epic heroism both in Bilbo's past actions and in Bard's slaying of Smaug, Tolkien is also interested in exploring a more modern notion of heroism, which connects courage to sympathy and understanding.

Chapters 16–17

Summary — Chapter 16: A Thief in the Night

As Thorin continues to search for the Arkenstone and as the rest of the dwarves worry about the armies camped on their doorstep, Bilbo decides that he must take matters into his own hands. With the help of the ring, he sneaks away from the mountain at night and into the camp of the lake men and the wood elves. There, he reveals himself and is sought before the leaders, Bard and the Elvenking. They are suspicious of him, of course, but they relax when Bilbo reveals his secret weapon: the Arkenstone. He gives it freely to Bard to be used as a bargaining chip against Thorin. Bard and the Elvenking are amazed that the hobbit would risk inciting the anger of the dwarves in order to prevent a war. They ask him to stay in the camp for his safety, but Bilbo decides to return to the mountain. On his way out of the camp, he runs into Gandalf, who pats him on the shoulder for his brave deeds. Gandalf has just arrived from his other affairs to see the end of this touchy matter. Newly hopeful, Bilbo sneaks back to the mountain unnoticed.

Summary — Chapter 17: The Clouds Burst

In the morning, Bard returns with two messengers to entreat Thorin to accept a peaceable agreement. When the dwarf again refuses, Bard reveals the Arkenstone, one part of the treasure that Thorin values above all the rest. Thorin is crushed, and he turns to Bilbo in rage when the hobbit reveals that he is the one who gave Bard the treasure. Thorin is about to turn violent, but then one of the messengers throws off his cloak and reveals himself to be Gandalf.
The wizard commands Thorin to let Bilbo speak. The hobbit claims that, in taking the Arkenstone, he only took his fair share of the treasure, as his contract as burglar had specified. Thorin has no choice but to agree, and he angrily offers to pay a fourteenth part of the treasure to regain the stone. The men and elves are satisfied with this. Thorin, however, secretly hopes that before they make the exchange, his relatives, who are marching toward the battlefield with an army under the leadership of Dain, will be able to capture the stone by force.

The new dwarf army threatens the elves and men, and they are about to engage in battle when darkness takes over the sky from the west. Gandalf tells them that a new danger has come: an army of goblins and Wargs who intend to take the treasure for themselves. The dwarves, elves, and humans are thus united against the goblins and Wargs in what is called the Battle of the Five Armies.

The forces of good fight fiercely, but the goblins and Wargs are just as fierce. Bilbo stays on the mountain, a bit removed from the fighting, and watches as the elves and dwarves first send the goblins fleeing but then are forced to retreat from the vicious Wargs. Thorin fights alongside the lake men as mightily as any. However, the goblins slowly gain ground, and Bilbo is forced to retreat to the elves’ camp, which is nearly surrounded. He stands close at hand when the hobbit’s keen eyes spy something in the distant skies: the great eagles are flying toward the battlefield. At that moment, however, a stone falls from the mountain and hits Bilbo on the head, and he loses consciousness.

Analysis — Chapters 16–17

In this section, the idea Tolkien began developing in Chapter 15—that the dwarves are in the wrong and that the truly heroic path is the one that ends in peace—comes to fruition with Bilbo’s moral choice to leave the dwarves. Bilbo’s motivations for defecting to the enemy camp are twofold. First, he realizes that the best way out of the conflict is a peaceful one. Second, despite his friendship with the dwarves, Bilbo feels more of a natural camaraderie with elves (and, to a lesser extent, with men) than with dwarves. Though this second motivation may be questioned, Bilbo’s defection is nevertheless one of the most courageous acts of his short career as a burglar, since without Gandalf’s intervention he may easily have been killed by Thorin for giving away the Arkenstone.

Bilbo’s defection also develops the strain of modern heroism in the novel, as opposed to the strain of heroism based on epic literature. Loyalty to one’s lord and solidarity to one’s group are among the paramount virtues in epic literature, but Bilbo abandons those virtues by making an independent moral choice, designed to create the best outcome rather than the outcome willed by his lord, Thorin. Tolkien further critiques the idea of unquestioned loyalty by emphasizing Thorin’s pigheadedness and bad behavior.

The moral hierarchy of race that has been developed throughout The Hobbit is brought into sharp relief with the arrival of the goblins and the Wargs. The appearance of these truly evil races forces the essentially good creatures to band together, as the armies line up according to fundamental divisions between good and evil, rather than according to claims for money. Certainly, the money is still at stake in the Battle of the Five Armies—it is the reason that the goblins and Wargs have come in the first place—but the more urgent conflict is between good and evil. The dwarves, elves, and men are all “Good People,” and, as we see here, this division runs deeper than the family pride of Thorin or even the long-standing feud between dwarves and elves. The alliance of dwarves, men, and elves recalls happier days when the three races were peaceful neighbors and worked together to create great cities.

The goblins’, dragons’, and other evil creatures’ increasing power and their near-victory in the battle signal the fading glory of Middle-Earth. Fortunately for the armies of good, one great race—the eagles—has been preserved almost untouched from the beginning of time. Once again, we see nature taking a side when good and evil clash. The pure eagles would not have intervened in a war over gold, but the involvement of the goblins cries out to their sense of good and brings them down from the mountaintops. Here Tolkien reiterates an essential quality of his fantasy world: evil, characterized by the perversion of nature, may become powerful, but the essential nature of the world is good.
Chapters 18–19

Summary — Chapter 18: The Return Journey

If more of us valued food and cheer and song above hoarded gold, it would be a merrier world. 
(See Quotations, p. 27)

When Bilbo awakens, he is still lying with a bad headache on the side of the mountain, but he is otherwise unharmed. From the camps below, he sees that his side has won the battle against the goblins and Wargs. A man comes searching for Bilbo but cannot find him until the hobbit remembers to take off his magic ring. Bilbo is carried back to the camp where Gandalf waits and is delighted to see the hobbit alive. However, there is sad business to attend to. Bilbo must say farewell to Thorin, who is mortally wounded. Thorin asks Bilbo's forgiveness for the harsh words spoken earlier.

Fili and Kili have also been killed, but the rest of the dwarves have survived. Gandalf describes the end of the battle for Bilbo: the eagles, watching the movements of the goblins, came just in time and turned the tide of battle. Yet things still might have gone badly were it not for the sudden appearance of Beorn in the shape of a bear, massive and enraged. This sent the rest of the goblins scattering, and now they are all either dead or in hiding.

Summary — Chapter 19: The Last Stage

The dead are buried, and Dain is crowned the new King under the Mountain. The dwarves are at peace with the lake men and the wood elves. Bard is the new Master of Lake Town, and from his share of the treasure, he gives Bilbo a handsome sum. Soon, it is time for the hobbit to return home. He travels with Gandalf and Beorn, taking the long way north around Mirkwood, for nothing could persuade him to enter that forest again. They spend most of the harsh winter at Beorn's house, with much feasting and merriment.

In the spring, they continue on to Rivendell. There, Gandalf and Elrond exchange many tales of great deeds, past and present, while Bilbo recovers from his weariness and wounds through rest and the magic of the elves. Bilbo learns the reason Gandalf left the company near Mirkwood: he was fighting alongside the council of wizards to drive the Necromancer out of the forest. Finally, Bilbo and Gandalf travel the last, long stretch of road back to the hobbit lands. Approaching his home, Bilbo receives a nasty surprise. He has been presumed dead, and the contents of his hill are being auctioned off.

Though he puts a stop to the auction and recovers most of his valuables, Bilbo is never again really accepted by the other hobbits. They view his adventuring with skepticism, and his return with gold and tales of dragons and war only confirms the hobbits' suspicion that Bilbo has gotten in over his head. This Bilbo doesn't mind—now that he has a wizard, elves, and the occasional dwarf coming to visit him, he does not care much for the company of respectable hobbits. Most important, however, he still has his kettle, his pipe, and all the comforts of his home at Bag End.

Analysis — Chapters 18–19

Thorin's parting words resolve The Hobbit's central conflict. Thorin at last regrets his greed, and he recognizes the value of a race like the hobbits (and particularly of Bilbo), which he had scorned at the beginning of the book. "If more of us valued food and cheer and song above hoarded gold, it would be a merrier world," Thorin says. Bilbo's love of food, cheer, and song seem like undesirable qualities when we first meet him in his hill at Bag End. However, the great elves share these qualities, while the ill-fated Thorin does not.

Throughout The Hobbit, Bilbo struggles to subdue his love of comfort, which is the product of his Baggins heritage, and to tune in to his love of adventure, which comes from his Took heritage. However, he never really loses touch with the Baggins in him. As he rests in Beorn's house, we see a return to the Bilbo who wishes nothing more than to sit in his old armchair. If The Hobbit has an overarching message, it is that even a small, unassuming person such as Bilbo possesses the inner resources necessary to perform adventurous, heroic deeds and that the transformation that makes him a hero does not erase his essential nature.
Bilbo’s heroic deeds are all the more remarkable because they fail to change him. He possesses a new confidence and a drastically widened perspective on the world, to the point that he now prefers the company of elves and wizards to that of other hobbits. Much of The Hobbit explores the contrast between the world in ancient epics that Tolkien studied as a scholar and the modern, English world in which he lived. The novel closes with a compromise between the two worlds: Bilbo goes on living amid the comforts of Bag End, but he passes his time reading and writing about adventure and conversing with characters from his heroic quest. In a way, this image is a concise symbol of Tolkien himself, living his comfortable life at Oxford while immersed in the grim, violent, imaginative realm of heroic literature, which he both studied and wrote.

The company’s quest, which seemed tainted by the greed that motivated it, is redeemed by its wide-ranging and beneficial effects. Lake Town is rebuilt stronger than before. Humans can once again live in Dale, no longer fearing the dragon’s fire. The goblins have been conquered, and, thus, much of the wilderness of the east has been made safer for travelers. Moreover, Bilbo hears in Rivendell that the errand that Gandalf performed while he was away from the quest was to join a great council of wizards, who have succeeded in driving the Necromancer out of southern Mirkwood. This is another incident that will have important ramifications in The Lord of the Rings, as the dark lord merely leaves Mirkwood to return to his ancient stronghold in the land of Mordor, where he attempts to conquer the world.

Despite our sense that other, perhaps grander, adventures are happening at the same time as the events recounted in The Hobbit, Bilbo nevertheless ends up playing a significant role in the larger affairs of Middle-earth. Certainly, without Bilbo’s intervention at several tough points, Smaug would never have been killed, the treasure would never have been recovered, and the goblins would still roam the Misty Mountains. He is without question a hero, although such a title would hardly suit his tastes. In the book’s last passage, Gandalf jokingly chides the hobbit about his insignificance, telling him that he is “only quite a little fellow in a wide world after all!” In part, the wizard is laughing at himself, because even he could hardly have foreseen just how important a role Bilbo would play.
1. “Let’s have no more argument. I have chosen Mr. Baggins and that ought to be enough for all of you. If I say he is a Burglar, a Burglar he is, or will be when the time comes. There is a lot more in him than you guess, and a deal more than he has any idea of himself. You may (possibly) all live to thank me yet.”

Gandalf speaks these words in Chapter 1 shortly after Bilbo faints from terror at the prospect of going on the quest with the dwarves. After Bilbo’s display of fear, the dwarves are skeptical that Bilbo will make a good addition to the party, and Gandalf gives this speech to ease their doubts. The speech is important both because it exemplifies Gandalf’s habit of insisting that his own authority be taken as definitive proof and also because it foreshadows Bilbo’s transformation into a hero. The trajectory of the novel from this point forward essentially involves Bilbo’s discovery of the “lot more in him” that even he does not yet know.

2. “It’s got to ask us a question, my precious, yes, yes, yes. Just one more question to guess, yes, yes."

Gollum speaks these words during his riddle game with Bilbo in Chapter 5. These sentences perfectly capture Gollum’s corrupt, sibilant, hissing, form of speech. He never addresses Bilbo directly but speaks only to his mysterious “precious,” calling Bilbo “It.” Gollum’s infatuation with his precious also acts as a bit of foreshadowing. Precious turns out to be the magic ring that Bilbo had discovered and placed in his pocket. Gollum’s devotion to the ring highlights its extreme, seductive powers.

3. “Somehow the killing of this giant spider, all alone by himself in the dark . . . made a great difference to Mr. Baggins. He felt a different person, and much fiercer and bolder in spite of an empty stomach, as he wiped his sword on the grass and put it back into its sheath. ‘I will give you a name,’ he said to it, ‘and I shall call you Sting.’

This passage from Chapter 8 depicts Bilbo’s reaction to his narrow escape from the giant spider of Mirkwood, one of the novel’s major turning points. Defeating a foe in combat gives Bilbo a taste of the confidence that he has not previously enjoyed, making him feel “much fiercer and bolder in spite of an empty stomach.” From this point forward, Bilbo shows that he is capable of taking the initiative and acting in the best interest of the company rather than his own self-interest, as his ability to ignore his hunger shows. He upstages Thorin as a leader and establishes himself as a hero.

Bilbo’s decision to name his sword is also symbolic. Named swords are marks of reputation and prowess in ancient epic literature, and Bilbo’s naming of his sword essentially represents his laying claim to the mantle of heroism.

4. “The most that can be said for the dwarves is this: they intended to pay Bilbo really handsomely for his services; they had brought him to do a nasty job for them, and they did not mind the poor little fellow doing it if he would; but they would all have done their best to get him out of trouble, if he got into it. . . . There it is: dwarves are not heroes, but calculating folk with a great idea of the value of money; some are tricky and treacherous and pretty bad lots; some are not, but are decent enough people like Thorin and Company, if you don’t expect too much.”

In this passage from Chapter 12, the narrator makes an apology for the dwarves’ bad behavior in sending Bilbo into the dragon’s lair all alone. The narrator implies that the dwarves’ cowardice is not really their fault. Their character— their greed and deceptiveness—is inherent to their race. Tolkien’s apologetic explanation
indicates the extent to which race is treated as a powerful determinant of identity in his Middle-Earth. No character is capable of breaking past the boundaries set by birth — goblins are all evil, elves are all good, and so on. It is important to note, however, that race in Middle-Earth is not the same as race in the real world.

5. “There is more in you of good than you know, child of the kindly West. Some courage and some wisdom, blended in measure. If more of us valued food and cheer and song above hoarded gold, it would be a merrier world.”

Thorin speaks these words in Chapter 18, just before he dies, asking Bilbo's forgiveness for his harsh words to him before the Battle of the Five Armies. Thorin acknowledges that, though in his greed he has looked on Bilbo's simple goodness with contempt, the world would be a better place with more Bilbos and fewer Thorins. This quotation places the book's contrast between the simple life of modernity and the grim heroism of the ancient epic in a new light. Bilbo initially felt that the rigors of heroism would force him to abandon the complacency of his simple life at Hobbiton. At the conclusion of the novel, we see that if everyone led a simple, hobbitlike life, the world would be free of evil, and heroism would, in effect, be unnecessary. This new understanding lies behind Bilbo's decision to return to Hobbiton at the end of the book and is Tolkien's closing moral position in The Hobbit.

Study Questions

1. Is Thorin in any sense a heroic leader? Do his actions in the novel make him deserving of his death at the end?

By the time the Battle of the Five Armies commences, Thorin has incurred the contempt and disrespect of many of the book’s characters (and probably most readers). But to Thorin’s credit, he shows tremendous courage in attempting to reclaim his ancestors’ treasure from Smaug. We come to learn that his failings—which become apparent once he is inside the Lonely Mountain—are common to all dwarves, who possess a great desire for gold and a fierce, even arrogant pride.

Thorin’s great crime is his ingratitude toward his benefactors, the many lake men who died so that Smaug could be killed. Thorin’s stubbornness over the legitimate ownership of the gold is dishonorable and costs lives, but he strives to redeem himself in the end by admitting his mistakes to Bilbo. Still, it is not really possible to consider Thorin a hero. He lacks the capacity to formulate and execute plans, and he relies on Bilbo to get him through nearly every difficulty he encounters.

2. Given his development throughout the book, does Bilbo belong in Hobbiton at the end of the novel? He is not completely accepted by the hobbit community, but he seems to be perfectly happy there. How do you think Tolkien views the relationship between heroism and the simple life?

At the beginning of the novel, the simple life seems antithetical to heroism, but by the end of the novel, after Bilbo has proven his common sense and courage, his resumption of the simple life seems like a small act of heroism in itself. Thorin comments that if more of the contentious warriors of the world lived the way hobbits do, it would be a happier world, and Bilbo’s return to Hobbiton seems an acknowledgment of the same idea. Heroism is important in a world beset with evil, but Tolkien suggests that if everyone lived the simple life of hobbits, evil would be obsolete. So, in a sense, Bilbo does belong in Hobbiton, even if he does not in the eyes of the hobbit community.

3. Where do humans fit in among the other races of Middle-Earth? Are humans a “good” race?

As we have seen, the various races portrayed in Middle-Earth each demonstrate very specific invariable characteristics. Human goodness does vary, however. Tolkien shows that in the human race, each individual determines his or her goodness. Bard, for instance, is a hero and a kind man, though grim. But the old Master of Lake Town is greedy and manipulative in an almost pitiful way—he dies out in the desert, clutching gold stolen from the town. Humans seem to be more often good than bad but mostly somewhere in the middle. The elves are the truly good race, and the goblins the truly evil one. Humans can match either race in kind but rarely in degree.

A Glossary of Terms in The Hobbit

Bag End  The hole occupied by the hobbit Bilbo Baggins.

The Bagginses  A somewhat noble line of hobbits who exemplify the desire of hobbits in general. These hobbits, of which Bilbo takes half his heritage on his father's side, are well-intentioned and enjoy the comforts of home.

Burglar  Bilbo's capacity in the quest to recover the treasure of the dragon Smaug. As a hobbit, Bilbo does not seem to fit the part of a burglar in the dwarves' schemes, but his unassuming nature coupled with his ability to become invisible with the ring he takes from Gollum makes him an effective burglar nonetheless.

Glamdring  Gandalf's sword, taken from the trolls in Chapter 2.

Hobbiton  Bilbo's village. Hobbiton is mentioned only once in this book as the name of the place where Bilbo lives, in the last chapter when Bilbo's address is given as “Bag-End, Underhill, Hobbiton.” Although the village is described in depth in The Lord of the Rings and other Tolkien works, nothing is revealed about it in The Hobbit.

Lake Town  A human settlement visited by Bilbo and company in Chapter 10.

Lonely Mountain  The whereabouts of Smaug the dragon and his hoard of gold, mined by Thorin's grandfather Thror. Lonely Mountain has a secret entrance with a secret keyhole, which Elrond discovers as he translates runes on weapons and maps.

Long Lake  A body of water near Lake Town. The Long Lake was so "wide that the opposite shores looked small and far, but it was so long that its northerly end . . . could not be seen at all." The dimensions of the Long Lake surprised Bilbo because he never knew a body of water that was not the sea could seem as large.

Middle-Earth  Tolkien's name for the elaborate fantastical universe he details. The concept of Middle-Earth, which is mentioned frequently throughout this SparkNote, is never mentioned within the text of The Hobbit. It is explicit only in The Lord of the Rings and The Silmarillion.

Mirkwood  Woods in Middle-Earth. Mirkwood is the last great obstacle before Lonely Mountain on the path the company takes on its quest. The company meets Beorn, a creature who has a house in the middle of the woods, in Mirkwood, and he offers them food and lodging as well as directions to exit the woods near their destination.

Misty Mountains  A range of mountains near the Edge of the Wild. Bilbo and the company of dwarves have to pass the Misty Mountains as part of their quest to the Lonely Mountain and its guarded treasure.

Moria  A place under the mountains where the mines are located. These are the mines in which Thorin's grandfather Thror labored only to have the dragon Smaug take away the bounty.

Orcrist  Thorin's sword, taken from the trolls in Chapter 2.
Precious Gollum’s name for his magic ring, which Bilbo finds and takes.

Rivendell A city of elves located just beyond the Edge of the Wild, near the foothills of the Misty Mountains, Rivendell is the last safe stop along the dwarves’ way to the Lonely Mountain.

Sting The eventual name of Bilbo’s small sword. Bilbo names the sword Sting after he kills a spider with it, and, thus, accepts his heroism as he honors his weapon by giving it a name like Orcrist or Excalibur.

The Tooks A line of hobbits who find amusement in adventure, unlike most other hobbits, who enjoy the creature comforts of home. Bilbo is half-Took on his mother’s side.
